

Catawba River Watershed Sustainable Growth Speaker Series

Providing the opportunity....
To focus on sustainability, economic growth and community.

- ◆ Lets face it, growth happens! As a region's policy maker, government official, regional professional or member of the community we have a responsibility to preserve an area's character and natural resources for the generations to come.
- ◆ We invite you to join us and take part in a speaker series focusing on how growth can happen while at the same time maintaining the sense of place currently enjoyed.
- ◆ Through sustainable growth and planning, we can preserve the natural settings and quiet charm, the agricultural economy base and historical areas of significance.
- ◆ Professional speakers will present material on planning for a region's future growth pattern and how the use of sustainable development practices can bolster an area's economy, increase community vibrancy and reduce the negative effects of stormwater and development.

Schedule of Events

Five - 3 hour sessions monthly

- ◆ January - Sustainable Growth and Economic Development
- ◆ February - Sustainable Community Design and Strategic Watershed Based Planning
- ◆ March - Alternate Stormwater and Low-Impact Site Design
- ◆ April - Green Building Practices and Xeriscaping
- ◆ May - Sustainable Growth Roundtable and Toolbox
