

Compliance Report

> PWS Home / Compliance Report

 This Compliance Report displays the status of all your available data for each location and sample event for your PWS along with relevant comments. Schedule comments only apply to the sample point and SE it is associated with.

The only schedule comment that will reduce the expectation of a full set of results for a given location/SE is “I contacted EPA and received approval for not having valid UCMR 5 results.” All other comments are for follow up purposes.

* in the results column indicates the result is in a hold status but has not been approved by the PWS or defaulted to approved 30 days after the laboratory loaded and approved the data.

Missing in the results column indicates there is no result reported for that analyte currently in SDWARS. A sample may have been collected but data from that sample has not been entered into SDWARS by the laboratory yet.
