

PWS Analytic Search Results

> PWS Home / Review Data / PWS Analytic Search Results

 To sort data, use the individual headers by clicking on them (e.g., Facility, Lab, Sample ID, etc.) or filter for data using the Filter search box. To filter, enter a specific identifier (e.g., sample point ID, Facility ID) in the Filter search box or enter a partial identifier (e.g., Searching "ABC" will return all sample records that contain ABC in any field). The Filter search box will filter data in all fields on the page.

Use the drop-down menu in the Status column to Hold, Approve, or Return to Lab. To officially release data to your State and the EPA you **MUST** change the status to **Approve** and click the **Save Changes** button at the bottom of the screen and then confirm the changes by clicking **Update Database** on the Save Status Changes pop-up window. The status should remain in **Hold** as long as the PWS is still reviewing the data and is not ready to take action on it. You should only select **Return to Lab** if you find an error in your results and the lab needs to make corrections.

You have 30 days from when the laboratory posts and approves your data to review and approve the data. If you do not electronically approve the laboratory data within 30 days of the laboratory posting approved data, the data will be considered approved by you and available for State and EPA review.

To download or print the data, use the icons next to the Filter search box. Click on the **analyte name** in blue text to view Quality Control (QC) data.

If your laboratory has entered comments, you will be able to click on the **sample ID** in blue text to view comments.
