Spring Time Is Here!

LCWSD

Thinking about irrigating your lawn and flowers?

You may be interested in a Irrigation Meter to suit your needs. LCWSD offers meters for "irrigation only." These meters are charged " No Minimum Bill" you only pay for water used for irrigation and no "Sewer Charges" are associated with this meter. These meters are offered at these reduced rates for residential customers with an existing 3/4" water meter only! (No other size meters are included with this offer).

The cost is $1750.00 to have it installed directly beside your current meter. The cost is $3200.00 to have it installed in any other location on your property (LCWSD discretion). These cost are due when applying for the Irrigation Meter. The added cost of remotely positioning the irrigation meter in any other location than beside your current meter is because of increased labor and materials to accommodate this.

Questions? Call us at 803-285-6919, Toll Free 1-800-832-2126 or visit us at www.lcwasd.org See Reverse Side for rate schedule and watering tips!

The rate schedule for the irrigation meters are as follows:

Tier 1 <10,000 gallons the cost is $4.83 per 1,000 gallons
Tier 2 10 – 20,000 gallons the cost is $12.08 per 1,000 gallons
Tier 3 >20,000 gallons the cost is $14.49 per 1,000 gallons

Remember! There is no minimum payment when there is no usage on an irrigation meter. Questions?

Established lawns and landscapes need only about an inch of water each week in temperate climates.

- **Set the run time for a zone of spray heads to just 12 to 20 minutes.**
- **Divide the run time into three or four cycles so each water application is fully absorbed.**
- **Turn your sprinkler system off (or install a rain sensor that does it automatically) when you get enough rain to soak the soil.**
